

? WHAT IS A PARENT AND CHILD IN JDX?

	Parent	Child
What is it	<p>Standardized language as seen in the Job Standards.</p> <p>If the language changes in the parent job description, then that language will automatically be updated in the child job descriptions.</p> <p>Users do not have access to modify a parent.</p>	<p>Customized version of the Job Standard language that is tied to a unique position number.</p>
When to use it	<p>If you want to start from the Job Standard language.</p>	<p>Only select a child job description when you want to update that or reclassify that job description of a unique position number.</p>
